PROFESSIONAL SUMMARY

Full Stack Developer with 2+ years of experience building production web applications using React/Next.js and TypeScript on the frontend, and REST APIs with Node.js-based and Go frameworks on the backend, backed by PostgreSQL. Experienced working in fully remote, async-first teams across multiple freelance and internship projects. Skilled at communicating technical concepts clearly to non-technical stakeholders, with prior experience as Co-Project Manager handling requirements, code review, and mentoring. Integrates AI tools (Claude Code) into the development workflow with a review-and-refine approach, ensuring AI-generated code matches business logic.

SKILLS

Frontend: React, Next.js, TypeScript, Angular, Tailwind CSS, ShadCN, MUI, React-Hook-Form, Zod, TanStack Query, TanStack Table, Next-Auth, Service Worker, PWA

Backend: Node.js, Hono (Bun), Go (Fiber), REST API Design

Database: PostgreSQL, Redis, Database Migration Scripting

DevOps/Tools: Git, GitLab CI/CD, Docker, Linux/CLI, Digital Ocean, Railway, Sentry

Other: RBAC & User Management Design, Payment Gateway Integration (Stripe, Omise), Technical Documentation, AI-Assisted Development (Claude Code)

WORK EXPERIENCE

Full Stack Developer – Internet Thailand Public Company Limited (INET)

Jul 2024 – Present | On-site

- Developed Angular admin dashboard for ONE ID identity verification system, with backend services built on Go Fiber and PostgreSQL
- Set up and maintained CI/CD pipelines using GitLab Runner; resolved bugs and security vulnerabilities
- Architected the WorkD Portal (workd.go.th) from scratch in Angular + PrimeNG, including User Management and RBAC design
- Improved page load performance using S3 presigned URLs and Service Worker caching
- Created an Angular knowledge base and mentored junior developers on the team
- Served as Co-Project Manager for an e-commerce project: gathered requirements, reviewed code, planned timelines, and coordinated directly with clients

Frontend Developer (Freelance) – Grand Player Studio

Mar 2024 – Jul 2024 | Remote

- Built a school management and student data dashboard using Next.js, ShadCN, and Tailwind CSS
- Implemented form validation with React-Hook-Form and Zod, and authentication with Next-Auth
- Built server-side paginated data tables using TanStack Query and TanStack Table

Full Stack Developer (Freelance, DevHouse Team)

Remote

- **TONG A Travel** — Built an online trip-booking platform for Phuket using Next.js, Tailwind CSS, Hono (Bun), and PostgreSQL, including PDF generation, payment gateway integration (Stripe, Omise), SMS OTP, multi-language support, and PWA features. Deployed on Digital Ocean with GitLab CI/CD.
- **Fish Auction** — Built a rare fish auction platform using Next.js, Zustand, TanStack Query, and Web Push notifications via Service Worker. Gathered requirements and designed UI in Figma, deployed on Railway with Sentry monitoring.

Software Developer Intern — AXONS (CPF IT Center)

Nov 2023 – Mar 2024 | Remote

- Developed the frontend of the "SMART Profile & License" system from Figma designs using React (Next.js), Tailwind CSS, and MUI
- Integrated Microsoft Authentication and REST APIs
- Collaborated with UX/UI designers, QA, and backend developers using Agile Scrum on Azure DevOps

Programming Mentor & Consultant (Independent)

Ongoing

- Mentored high school students competing in the NSC (National Software Contest)
- Advising "Aziz" team (high school students) on building an AI RAG solution for the Thailand Halal Scientists' Competition 2026

EDUCATION

Prince of Songkla University, Hatyai — B.Eng. in Computer Engineering

- University representative, Startup Thailand League 2021
